& SECURE

OPEN. CONNECTED. INTELLIGENT.

Built for Today's Imaging. Ready for Tomorrow's Care.

ONIX AI is a next-generation radiology platform that connects your imaging ecosystem — PACS, RIS, and Teleradiology — with intelligent workflows and AI-powered capabilities.

No fragmented systems.

No disconnected workflows.

One intelligent platform across your imaging operations.

PACS

Secure storage, seamless access and retrieval, access from anywhere using secure login credentials.

RIS

Automated case routing, centralized workflow management, voice-to-text reporting, customizable reports, and AI-powered radiology copilot.

Teleradiology

24x7 coverage, specialty based case routing, faster TAT.

EVERYTHING
RADIOLOGY NEEDS.
IN ONE PLATFORM.

A Complete AI-Native Platform

View. Analyze. Report. Collaborate. All in One Place.

DICOM Viewer

Fast, intuitive and feature-rich viewer for everyday and advanced reading.

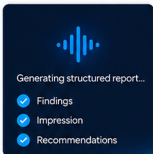

Ask ONIX AI

Get instant answers, findings, comparisons and clinical insights from your studies.

Voice-to-Structure Reporting

Convert your voice into structured, high-quality reports using AI.

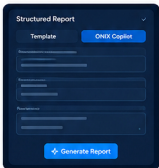

Case Rooms

Collaborate with your team, discuss cases and get second opinions seamlessly.

Custom Reports & Onix Copilot

Use custom templates and domain-aware AI copilot for faster reporting.

Admin Console

Manage users and workflows, automate case routing, and track TAT and analytics.

IMPROVED ACCURACY

HIGHER PRODUCTIVITY

BETTER COLLABORATION

ENHANCED PATIENT CARE

Technology That Puts Organizations First.

At ONIX AI, we help hospitals, diagnostic laboratories, imaging centers, and teleradiology teams run radiology on one intelligent platform. Streamline workflows, manage cases, connect teams, and deliver faster, more consistent reporting.

For Imaging Centers

Centralized case tracking, workflow management, and faster reporting across every modality.

For Radiology Teams

Smart case assignment, AI-assisted reporting, collaboration, and quality management in one workspace.

For Organizations

Real-time visibility, scalable operations, administrative control, and seamless integration across sites.
